- [REDACTED]

A dedicated electrical engineer experienced in construction and project management, electrical equipment testing, and technical report writing

---

## EDUCATION

---

Bachelor of Science in Electrical Engineering  
[REDACTED] 2021

## CERTIFICATIONS

---

Registered Electrical Engineer  
Passed 2021  
[REDACTED]

Registered Master Electrician  
Passed 2018  
[REDACTED]

## RELEVANT SKILLS

---

- AutoCad Drawing
- Well-versed in NETA Standards and Procedures
- Oriented in MS Office Applications
- Hardworking, has a good communication skills, and a team player

## WORK EXPERIENCE

---

Associate Engineer, Technical Writing, Services  
[REDACTED]

September 2023 - Present

- Create quality reports from raw data ranging from acceptance testing, maintenance testing, and infrared reports.
- Validate electrical test data for different types of electrical equipment such as cables, circuit breakers, panelboards, switchgears, switchboards, transformers, metering devices, rotating machinery, grounding systems, and insulating liquids as per IEEE/NETA, NEMA, NFPA and ASTM standards, and other references such as Doble Engineering.
- Perform peer review of test reports generated by peer report writers and provide feedback and correction as necessary.
- Review correctness of datasheets daily.
- Participated in creating and updating electrical equipment testing training materials for new hire report writers.

Operations and QA/QC Electrical Engineer  
[REDACTED]

October 2021 - March 2023
