Work Experience

[REDACTED]

April 2014 – Present  
Team Lead

Projects:

Utility Company in US

July 2023- Present

**Role: Power BI Developer**

**Project Role Description:**

As Power BI Developer, assisted the business in transitioning from Mobius reports to Power BI, improving data visualization and reporting capabilities.

Responsibilities:

- Developed interactive Power BI dashboards and reports to meet business needs and improve decision-making.
- Migrated data from legacy Mobius reports, ensuring data accuracy and consistency in Power BI.
- Worked closely with business stakeholders to gather requirements and tailor reports to their needs.
- Cleaned, validated, and optimized data for seamless integration into Power BI reports.
- Utilized DAX and Power Query to build efficient data models and improve report performance.
- Delivered actionable insights through dynamic visualizations, enhancing the overall reporting process.
- Conducted unit testing on Power BI reports to ensure functionality and accuracy.
- Resolved defects identified during UAT, ensuring reports met business requirements and expectations.

Electricity Infrastructure Company in Australia

March 2021 - July 2023

**Role:** Power BI Developer

**Project Role Description:**

As a Power BI Developer, primary objective revolves around transforming raw data into actionable insights via dashboards and reports.

Responsibilities:

- Developed core reports in Power BI and performed data validation using SQL and Databricks to ensure the accuracy and integrity of the report.
- Extracted, transformed, and loaded (ETL) data from various sources including SQL (Azure databricks) databases, Sharepoint and Excel files to create a unified data model for analysis.
- Collaborated with stakeholders to gather requirements and refine data visualization designs to meet business objectives.
- Developed and maintained documentation for Power BI solutions including data models, report specifications, and user guides.
- Resolved defects raised by testers, ensuring high-quality deliverables.
- Strong data analysis and visualization skills
- Experience with SQL, Power BI, DAX, and M language
- Attention to detail and problem-solving skills

**Transaction Management Services for Utility**

**Companies in US**

July 2014 - November 30, 2020

**Role:** Lead Cloud Support Engineer

**Project Role Description:**

Act as software detectives, provide a dynamic service identifying and solving issues within multiple components of critical business systems.

Responsibilities:

- Uses Oracle PL/SQL for gathering and querying data for client's inquiries.
- Uses Axosoft and Azure DevOps on creating tickets/incidents.
- Create reports thru SSRS.
- Monitoring databases.

- Maintaining client's server and pipeline processes.
- Knowledgeable in EDI and XML business transactions.
- Uses SVN and Git as code repositories.
- Leads the Tech Liaison team and directly working with onshore operations teams if urgent items are raised.

---
